TODAY'S AGENDA

TODAY'S AGENDA

CHANGES TO THE GENERAL ORDER

- **ALL** members must participate in an outreach event annually
- Nitrogen Management Plans and Summary Reports will now include Irrigation and Nitrogen Management Questions (now called the INMP)
 - All Growers Report Irrigation and Nitrogen Summary Data in 2021
 - Growers in low vulnerability areas may be required to have INMPs certified
- Farm Evaluation requirement reduced to every Five years

DRINKING WATER SUPPLY WELL MONITORING

- Any Well used for **Human Consumption** is subject to this requirement
- Testing for Nitrate + Nitrite-N levels only
- Must be Analyzed by Certified Laboratory
 - List of local labs mailed to all members
- Results reported by lab to State Water Resources Control Board's GeoTracker database
 - Reporting costs part of Lab Fee

DRINKING WATER SUPPLY WELL MONITORING

- Frequency of Testing
 - 0-8 ppm: Test every year for 3 years, then once every 5
 - 8-10 ppm: Test every year
 - > 10 ppm: No further testing, well cannot be used for Human Consumption
 - Users must be notified
 - Replacement Water may be necessary
- Supply wells must be sampled by end of 2020
- Data upload is slow process
- We Recommend early testing
- **Not a Coalition Program**

TODAY'S AGENDA

DUE DATES

AgLine Crop Water Use

The AgLine information system provides crop water use information for the Kings River service area. Information provided for each crop includes:

- Crop water use for the past 7 days
- Predicted water use for the next 7 days
- Total crop water use season to date

These numbers, updated weekly, can be used to assist growers in irrigation management decisions. AgLine includes crop water use data for 31 cropping cases.

GROUNDWATER QUALITY MONITORING

- Two Separate Groundwater Monitoring Requirements now in effect
 - 1: Domestic Drinking Water Well Testing
 - 2: Groundwater Trend Monitoring Plan

- Testing of Irrigation Wells within the High Vulnerability Area is recommended

GROUNDWATER QUALITY TREND MONITORING

- Annual Survey of Groundwater Quality
 - Mid-Late June Survey Period
- Mix of Shallow Ag, Domestic, and Public Wells
- Test Results are Available to Participating Growers/Agencies
- Must have Well Construction Data
- Long Term Tracking of Water Quality in Uppermost portion of Aquifer
- Still some Gaps in Desired Coverage

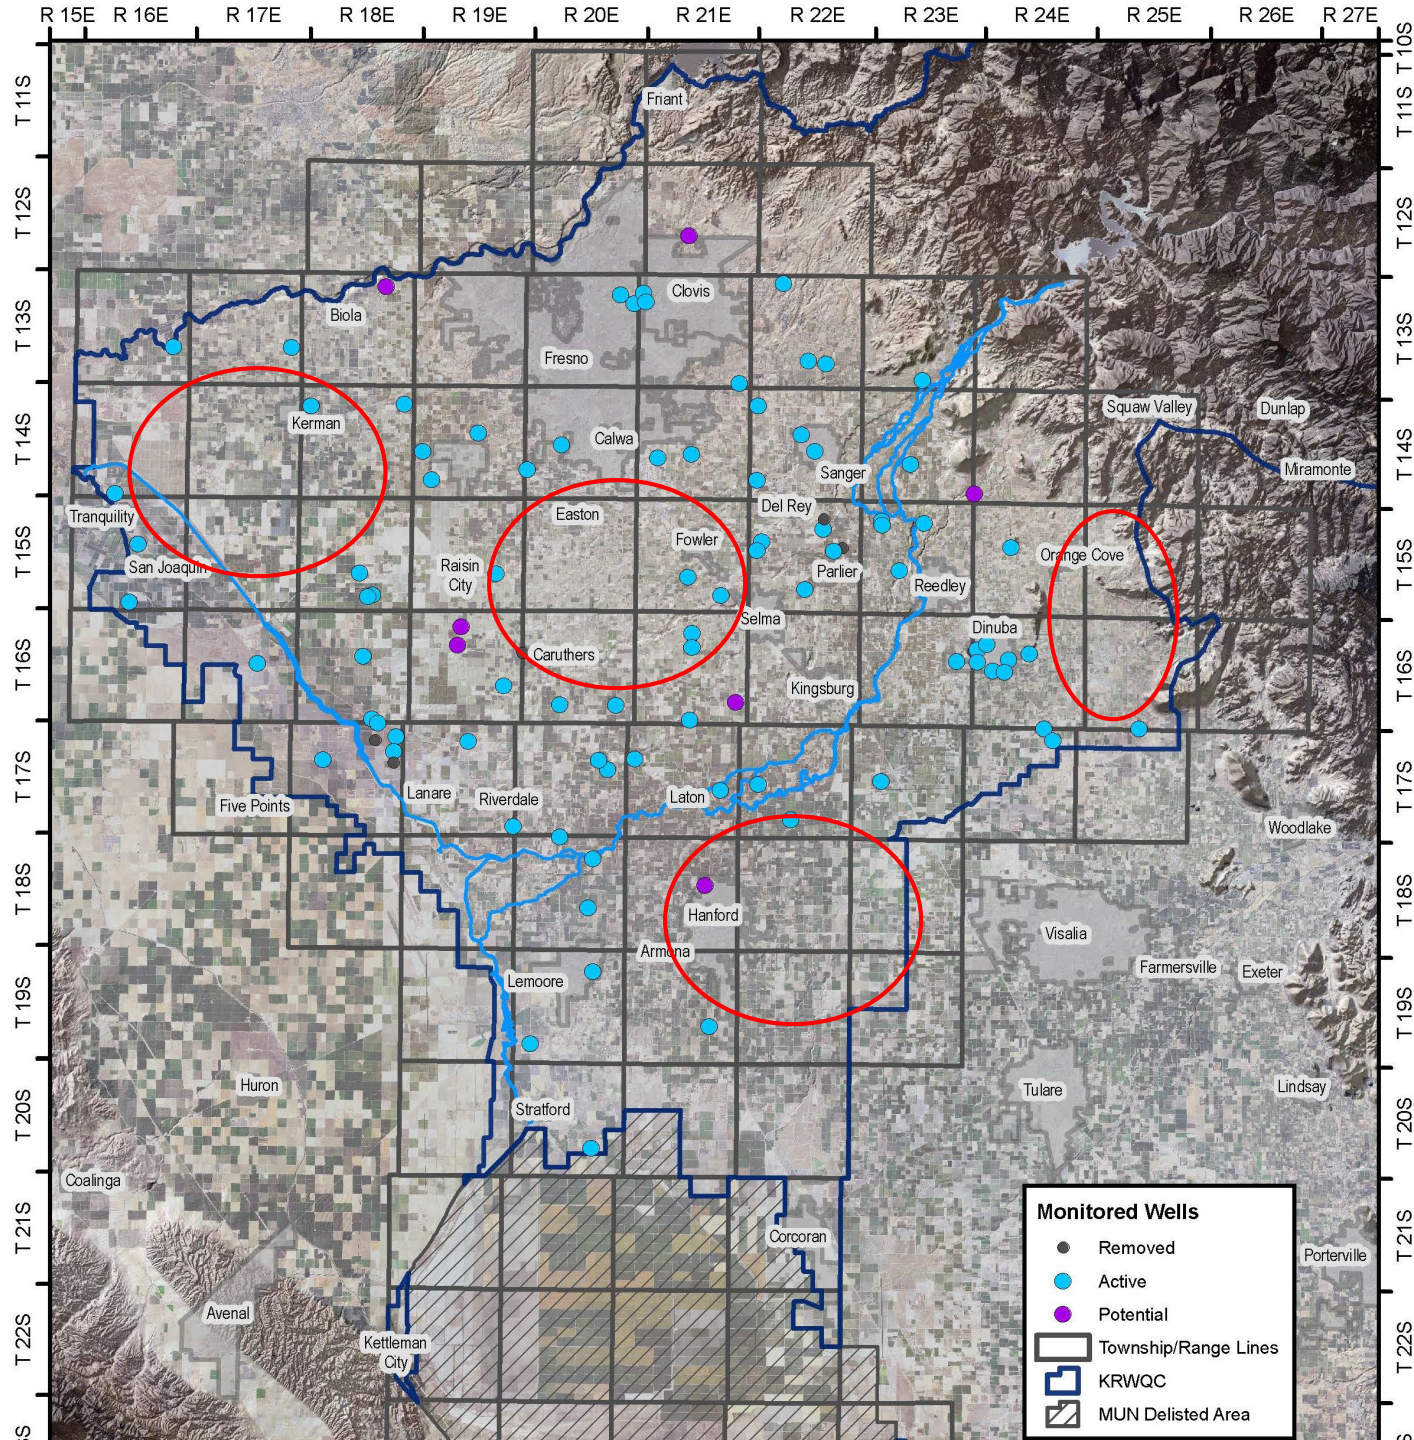

GROUNDWATER TREND MONITORING NETWORK

-Used to develop
water quality
trends over time

-Need to resolve

TODAY'S AGENDA

NITROGEN USAGE FEEDBACK

- Coalitions are Required to Analyze and Discuss Nitrogen Application Trends
- How Growers Compare to Others within a Township
 - If Applied/Removed (A/R) is beyond a calculated value (based on data received), parcel would be designated an “outlier”
 - Any metric can be used
 - May or May Not require corrective action on part of grower, depending on conditions
 - Consistently being Identified as an Outlier can trigger increased regulatory inquiry
 - May require Certification of INMP if Outlier in Low Vulnerability Area
