

Reduce Online Payment Fees with ACH

Beginning this billing cycle, KRWQC members can choose a faster, more affordable way to pay online. ACH (bank-to-bank) payments are now available through the Member Portal—offering up to 90% savings on processing fees compared to credit card payments.

A full-page insert with step-by-step instructions on how to setup ACH will be included with your invoice.

NOTE: Checks are still an acceptable form of payment.

Reliable

Payments typically clear within 1–2 business days.

Secure

Transactions are processed through the same encrypted network trusted for payroll and tax refunds.

Cost-Effective

A \$200 invoice has an ACH fee under \$1, versus \$8.75 when using a credit card.

Breakdown of Your Fees

Growers have the option to participate in (1) general waste discharge requirements for irrigated lands through a third-party representative such as the Kings River Water Quality Coalition or (2) individual waste discharge requirements for growers who are not part of a third-party group. Cost estimate comparisons between the Coalition’s shared resources and individual permits follow:

Cost examples of 2025 regulatory coverage under the Kings River Water Water Quality Coalition:

Farm Size	Annual Fees	All Other Programmatic and Administrative Fees	Total
50 Acres (small)	\$85.68	\$163.39	\$249.06
400 Acres (Average)	\$685.40	\$1,307.11	\$1,992.51

*Based on Priority 1 fee category and includes credits and draw from reserves.

Cost examples of 2024 regulatory coverage under the Individual General Order:

Farm Size	Annual Fees	Estimated Monitoring & Reporting Fees*	Total
50 Acres (small)	\$1,870	\$3,995.39	\$5,865.39
400 Acres (Average)	\$13,091	\$31,963.13	\$45,054.13

*Inflation adjusted from Draft Technical Memorandum Concerning the Economic Analysis of the Irrigated Lands Regulatory Program (2010)

Invoices for the 2025-2026 coverage period have been mailed.

Payment is due by October 31, 2025

A 15% late fee will be applied to any payments received after 10/31/2025

Time for Trivia?

Answers written below, upside-down in small type

Question 1

How many gallons are in one acre-foot of water?

Question 2

What does CIMIS stand for?

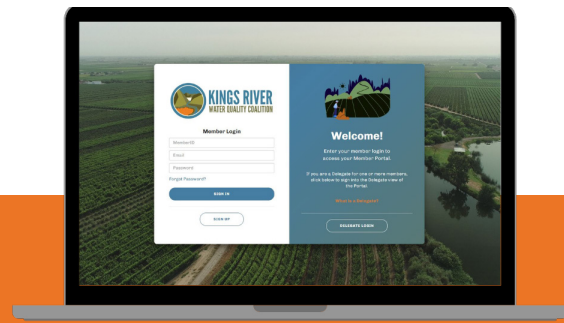

Q1 Answer: 325,851 gallons—enough to supply two families for a year.
Q2 Answer: California Irrigation Management Information System

Annual Outreach Participation Requirement

Did you miss participating in the KRWQC's annual in-person or live webinar workshops for outreach credit? You can view the recording until November 30th via the Member Portal (kingsriverwqc.org/account) by selecting "Outreach". If you represent more than one KRWQC member provide all associated Member IDs at the end of the video for credit.

Members, or a designated representative, are required to participate in one outreach activity annually, either in-person or online.
